

# DICES aims to tackle social exclusion.

DICES is an EU Horizon project that investigates the **real-world impact of social economy organisations**, especially in **care and vulnerable communities**, and identifies governance and policy solutions that unlock their potential to **promote inclusion, improve workplaces and reduce inequality across Europe**.

## Our goals:

Build **evidence on the role and impact of social economy** organisations in reducing social exclusion and fostering inclusion.

Support the adoption of **effective policy measures** by addressing legal and regulatory barriers and scaling good practices.

Improved **working conditions in social economy organisations**, including in the care sector.
